

How to Customize PDFs

This guide demonstrates how to customize your PDFs.

Written By: Dozuki System

INTRODUCTION

This guide demonstrates how to customize your PDFs.

This guide shows you how to use CSS to customize the PDF output of your guide.

Step 1 — How to Customize PDFs

- To access the user menu, click on the drop-down arrow next to your name in the right of the site header and select **Manage**.

Step 2

 This block contains two screenshots. The left screenshot shows the 'Configuration' sidebar with 'Appearance' highlighted by a red box. The right screenshot shows the 'Appearance' settings page.

Appearance		
Theme	Carbon Black	Edit
Logo	HANSAW	Edit
Custom Guide PDF CSS	Default	Edit
Custom CSS	Custom	Edit
Custom header HTML	Default	Edit
Custom footer HTML	Default	Edit

- Select the **Appearance** subsection under **Configuration** on the side bar.
- Click on the **Edit** button in the **Custom Guide PDF CSS** section.

Step 3

The screenshot displays two side-by-side panels from a web application. The left panel, titled 'Logo HANSAW Edit', contains a 'Custom Guide PDF CSS' section with a large text area for entering CSS. Below this is a 'Preview' section with a text input for the guide title and two buttons: 'HTML' and 'PDF'. The right panel, titled 'Custom Guide PDF CSS Cancel', shows the same CSS text area with a single line of CSS code: `1 .stepImages .noImage {background-image: url(/static/images/guide/NoImage_592x444.jpg);background-position: center;background-repeat: no-repeat;display: none;}.revisionid { display: block; }`. Below the code is a 'Preview' section with a text input and 'HTML' and 'PDF' buttons. A preview window is open, showing a document titled 'How to Set up your Directv HDTV Receiver' with a 'my SKY User Manual' header.

- You can now enter your custom CSS in the Custom CSS PDF field.
- You can also preview an HTML version of your PDF. This allows you to target specific elements of your PDF that you want to customize with CSS.
 - ① This HTML preview of the PDF allows you to use Chrome DevTools or Firefox's Firebug to see the HTML structure and stylesheets used to style the PDFs.

To reassemble your device, follow these instructions in reverse order.
