DOZUKI

How to Make an Approval Process a Site Default

This guide demonstrates how you can select an Approval Process to automatically be assigned to any new guide created on your Dozuki site.

Written By: Dozuki System

INTRODUCTION

This guide demonstrates how you can select an Approval Process to automatically be assigned to any new guide created on your Dozuki site.

Requirements

- Approval Processes can only be applied to guides if you have the <u>Version Control</u> features activated on your Dozuki site. Contact <u>support@dozuki.com</u> to request for these features to be activated.
- Only **Site Administrators** have permission to view, create, edit, and assign Approval Processes.

Notes

To ensure complete document control, a Default Approval Process will automatically be assigned to both Major Release and Minor Release Approval Process fields.

Step 1 — Open the Management Console
